Projects

LumiSense – Smart Adaptive Street Lighting System

- **Tech:** Arduino, Sensors, Automation
- Developed a smart street-lighting system that automatically adjusts light intensity based on movement and surrounding conditions.
- Reduced unnecessary electricity consumption by dynamically controlling street-light brightness.
- Integrated sensors with Arduino for automated and energy-efficient street lighting.

experiences

- **Fresher** – Currently pursuing B.E. in Computer Science (Data Science).

Achievements

-

Education

B.E. – Computer Science (Data Science) **2025 – 2029**
Adhichunchanagiri Institute of Technology, Chikkamagaluru, Karnataka **CGPA: 8.6**
